

- (58) Maryam xod=rā be divanegi zad
 Maryam self=RA to madness strike.PAST.3SG
 ‘Maryam feigned madness.’

Not all nouns for illnesses and problematic states can occur in this complex predicate. To account for this, we indicate that the noun, too, has an idiomatic meaning, an *i-rel*, in addition to its usual meaning, and only the nouns which have such an *i-rel* can participate in the complex Predicate with *xod=rā zadan*. Here, the case is close to that of an idiom, but the noun does not have a special meaning: it is special in that not all nouns with a comparable semantics can form such a complex Predicate with *xod=rā zadan*.
